

# BUSINESS MATH SKILLS MODULES

**MBTN**  
ACADEMY

## SUGGESTED MODULES:

- Statistics 1: Introduction
- Algebra 1
- Percentages
- Weighted Averages
- Growth Rates

**Build student confidence early in the curriculum with these business math skills modules. Problem sets gently introduce business topics. All for under \$15 / student!**

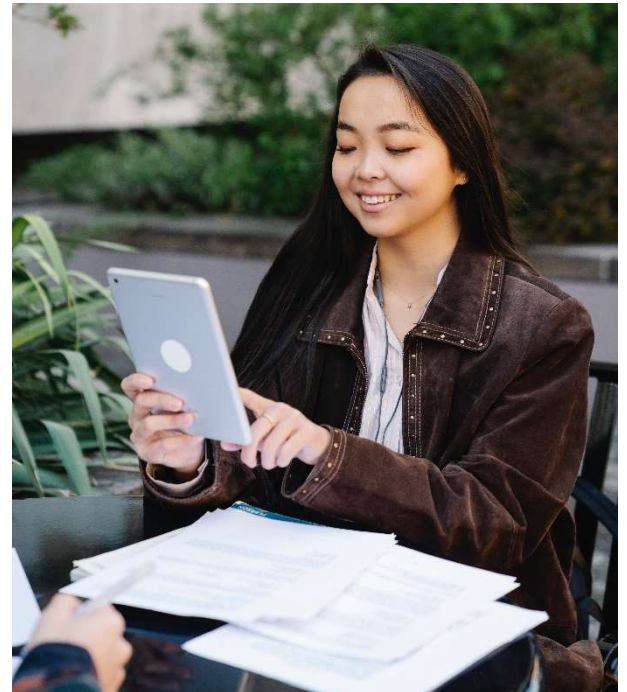

**Statistics 1** addresses measures of central tendency and measures of variability.

**Algebra 1** reviews algebra skills needed for MBTN including order of operations, techniques for solving for X, and converting business problems to the appropriate equations.

**Percentages** provides an introduction to calculating percentages in a business context, as many key performance measures use percentages, such as financial returns, growth rates, and market share.

**Weighted Averages** defines weighted average, how to calculate it, and provides examples of how it is used in business. The examples cover multi-tiered weighting problems as well as solving for a goal value within a weighted average context.

**Growth Rates** covers simple growth, average annual return, CAGR, and converting effective growth rates from one time period to another.

## PRICING PER STUDENT / SEMESTER

1-3 Modules:	\$9.95
4-6 Modules:	\$14.95
7-10 Modules:	\$19.95
All Modules:	\$39.95

## PRODUCT OVERVIEW

MBTN allows your students to review and apply business concepts at their own pace through easy-to-use, **on-line tutorials and problem sets**, authored by professors at leading business schools.

Our goal is to improve students' business skills through these interactive exercises. We look forward to working with you!
