

STATISTICS 4: NONLINEAR REGRESSION

DESCRIPTION:

This module covers statistics commonly used to describe the nonlinear relationship between numerically-scaled variables.

Tutorial: 30 slides
Problem Sets: 4 problem sets; 24 questions
Average Time: New Module – No data

Sample question from problem set:

Course: 2020 Testing Update

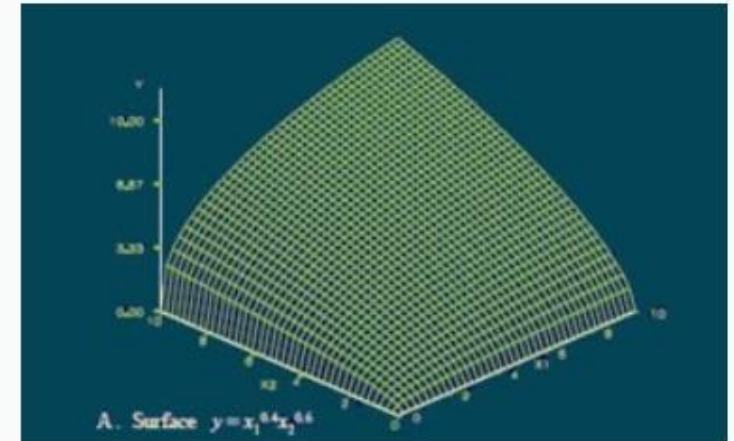

Module: Statistics 4: Nonlinear Regression / Problem Set ID: 11142

Answer the following multiple choice and true / false questions based on the tutorial.

Model Specification is the process of using regression techniques to determine the best parameters for a given model.:

1. True
2. False
3. Insufficient information provided
